

# Chemical Compound

Product	Name	Application	Packing
	<b>B-1040, B-1050</b>	Cleaning & Polishing of ferrous & nonferrous metals like, steel, alloy, silver, gold, silver, gold, copper, bronze, etc.,	30 Kgs./ Pail
	<b>BWR-2140</b>	Rough grinding of aluminum and steel. The trouble of using and acid etching process for components can be solved and replaced by the chemical reaction of this acidic compound during the	30 Kgs./ Pail
	<b>BWR-28850, SC-388</b>	Multi-purpose grinding & polishing compound with inhibitor, suitable for all kind materials.	30 Kgs./ Pail
	<b>BWT-10140</b>	Polishing of steel, aluminum alloy and zinc components. It is more suitable to use together with porcelain media (SY type), in order to avoid any pitted surface that creating by steel ball	30 Kgs./ Pail
	<b>BDC-100</b>	Dry polishing compound with soft media for mirror polishing.	20 Kgs./ Pail
	<b>BWCB-10</b>	Cleaning & Polishing Compound for oil part or heavy dirty part such as steel ball.	30 Kgs./ Pail
	<b>ANTI-R20</b>	Effective Anti-Rust Compound for steel ball media.	30 Kgs./ Pail
	<b>X74-26A</b>	Water soluble anti-oxidation or anti-rust for all kind for metal parts.	25 Kgs./ Pail
	<b>BWAX-240</b>	Polishing compound for steel ball media and high temperature application.	30 Kgs./ Pail
